

Dear Parent / Carer

Your child has been invited to take part in an online World Education Robotics competition. It is aimed at upper primary aged pupils and you do not need any special equipment or experience to access it.

The competition starts on 18th May and all work must be submitted by 8th June.

The competition involves 4 challenges that your child can enter. They can enter as many or as few as they like.

The following website <https://sites.google.com/she.gdst.net/wer/home> explains the challenges in more detail.

To enter they need to contact their teacher and share either a picture or a video of their work. However, by entering this competition and submitting work, you are agreeing for their work to be shared and viewed on the website which will be accessible by people outside of your school. Therefore please **do not include any faces** and **use only first names** in all work.

The work will also be accessible to our judges who have a variety of backgrounds in the STEM field and they will review the entries on 15th June.
