

|                                               |                                                  |
|-----------------------------------------------|--------------------------------------------------|
| 3 is a factor of mine                         | I am not divisible by the sum of $2^2$ and $1^2$ |
| The sum of my digits is greater than 10       | All my digits are different                      |
| Divide me by 3 and the answer is less than 65 | I am nearer to 200 than to 160                   |
| Divide me by 2 and you get a remainder        | I am not a multiple of 6                         |
