

Negative Number Calculations

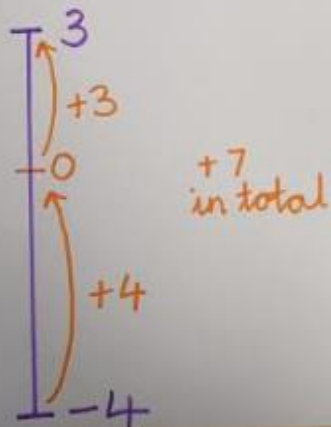

'Apple' Count up to Zero

① $-3 + 4 = 1$

e.g. On Monday the temperature was -3°C . On Tuesday, it was 4°C warmer. What was the temperature on Tuesday?

② $-4 + 7 = 3$

e.g. In Iceland, it was -4°C and in England it was 3°C . How much warmer was it in England than Iceland?

You can use a vertical number line (where the negative numbers are on the left) if this helps you more.
