

Y1 The human body

Key Learning Objectives:

- identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense

How you can help at home:

Discuss different body parts and their functions.

Complete home learning tasks linked to this objective.

Learn about the 5 senses

Key Vocabulary

Word	Definition
Skeleton	Inside the human body are the bones of our skeleton , supporting our body and holding it up. The skeleton provides a protective cage for the delicate organs inside. The ribcage protects the heart and lungs.
Sight	Your eyes let you see all of the things around you.
Hearing	Your ears let you listen to all the things around you. Your brain is able to tell what different sounds are.
Touch	Your skin gives you the sense of touch. You can tell if something is cold, war, smooth, rough or wet without even touching it.
Taste	Your sense of taste comes from your tongue. You can tell if something tastes bitter or sweet. You might have some tastes you like and some you don't.
Smell	You smell using your nose. Your nose can tell if something smells nice or not.
Heart	Your heart is a very strong muscle that pumps blood around your body.
Lungs	Your lungs are air sacs. As you breathe in (inhale), you fill these sacs with fresh oxygen-rich air. Your heart pumps blood into the walls of your lungs where it absorbs oxygen and releases carbon dioxide
Brain	The brain is the centre of the human nervous system, controlling our thoughts, movements, memories and decisions
