

Year 1 Plants

Happy Children, Happy School, Growing Together

End Points:

- Identify and name a variety of common wild and garden plants, including deciduous and ever-green trees.
- Identify and describe the basic structure of a variety of common flowering plants, including trees.

Key Vocabulary

Word	Definition
Root	The part of a plant which attaches it to the ground or to a support .
Stem	The main body or stalk of a plant or shrub .
Leaf	A flattened structure of a higher plant, typically green and blade-like, that is attached to a stem directly or via a stalk. Leaves are the main organs of photosynthesis and transpiration.
Petal	Each of the segments of the corolla of a flower, which are modified leaves and are typically coloured.
Flower	The seed-bearing part of a plant, consisting of reproductive organs .
Deciduous	A tree that sheds its leaves annually.
Evergreen	A tree that retains green leaves throughout the year.
Trunk	The main woody stem of a tree as distinct from its branches and roots.
Branch	A part of a tree which grows out from the trunk.

How you can help at home:

Observe plants in their natural environment.

Discuss differences and similarities between plants.

Experiment growing plants at home.
