

Programming Club (Mini Programmer)

At **TechCLub4Kids**, we are thrilled to offer a wide range of exciting opportunities, including Technology (Programming, Science, Engineering) assemblies, dynamic workshops, and immersive after-school clubs. Our ultimate goal is to ignite a lifelong passion for learning in children, empowering them to explore and discover the wonders of the world around them. We provide the perfect platform for kids to unleash their creativity and curiosity.

The **Mini Programmer** course is a fun and educational series of coding sessions for primary school children who have basic familiarity with programming. Using a block-based coding program is suitable to learn **coding concepts** and **solve problems**. Besides, it is a great opportunity to help them to develop their problem-solving skills and self-confidence. They learn to make animations, play music, make comics and games in a fun and exciting way!

The Club will be run for 9 weeks from Monday 13th January until 17th March inclusive. It is from 3:20 - 4:20 at school and the total cost is £72, Restricted availability of 15 places. It is a first-in, first-served system, payment via the website will guarantee your child a place.

Please note that once payment has been received, you have reserved the place for your child and we can not issue any refunds. If the school has to cancel the class then a refund will be possible. You can find more information on our website:

www.techclub4kids.com and register and then book your child. If you have any questions or need more explanation, please contact us by email at contact@techclub4kids.com.
